OFFICE ACTION AMENDMENT AND RESPONSE

In response to the Office Action dated October 11, 2001, the following amendment and remarks are submitted:

IN THE SPECIFICATION

Please amend the Specification as follows:

On page 15, lines 17 - 21, substitute the paragraph:

N.E.
~~As shown in Figure 9 an electrical contact shut-off switch 114 may be slidably mounted so that it~~
may be manually positioned at any point within at least one of the four spaced-apart U-shaped columns 32, 34, 36 and 38. When the spaced apart ramps 22 and 24 are elevated to [the] a desired vertical position, the shut off switch 114 is manually slid to a point within the column 32, 34, 36 or 38 where it [touches] contacts a portion of the cross member end block 30 and is then secured [fastened] into place. When the end block 30 contacts the shut off switch during subsequent operation of the vehicle lift, the shut off switch 114 will be activated and the electric supply to hydraulic pump 10 will be interrupted.
